Academic Camps Combine Education and Fun

Local camps help students maintain school skills in a relaxed environment.

BY MARILYN CAMPBELL
THE CONNECTION

One summer Ana Lado created a summer camp activity for students at her neighborhood pool. The Marymount professor set up a picnic area, and included activities and books. Her plan was to engage the students and give them the opportunity to read and build reading skills while still enjoying fun activities traditionally associated with summer.

"I got six kids who were older to read to six kindergartners. I chose kids who had potential, but who were at risk," said Ana Lado, Ph.D., professor of Education at Marymount University in Arlington. "Reading with a kindergartner or first grader for 15 minutes got the students reading and built their confidence."

This summer Lado and her colleagues at Marymount are offering "3E: Explore, Enrich, Enjoy," one of several area camps with an academic component. Their goal is to enable students to brush up on, gain or maintain academic skills in a relaxed environment.

Marymount's 3E camp enables campers to choose what they focus on at camp. In addition to traditional camp activities, the camp will include academic projects like exploring science through nature and electronic gadgets, studying math by making boats, language arts by writing their own stories and fine arts by creating plays and cartoons.

For those who want an in-depth review of a school subject and the chance to participate in hands-on summer camp activities, academic camps fill both needs.

"[Academic camps] supplement what students are getting during the school year and allow them to experience subjects and topics that they're not getting in public school," said Dan Stalcup, Associate Director for Fairfax Collegiate, a Herndon-based organization that offers summer programs for students entering third through ninth grade.

Programs at Fairfax Collegiate run the gamut from filmmaking and robotics to engineering and classic children's literature. For example, third and fourth grade students can learn to craft their own short stories during a Story Writing course in Alexandria, Chantilly and Ashburn.

Campers who enjoy reading and want to delve into award-winning novels by authors such as Madeleine L'Engle or Rebecca Stead can take "Reading Newbury Winners" with sessions in Chantilly, Ashburn, Fairfax, McLean and Reston. Students can spend two weeks reading books that have been

awarded the Newbery Medal for excellence in literature for children.

Fifth and sixth graders who love math and want to hone their analytical and logical thinking skills can spend their time engaging in chess, Stratego and

other mind-bending activities in the "Brain Games" camp, which will be offered in Chantilly, Reston, Herndon, McLean, Alexandria and Oakton.

Future detectives might enjoy taking a forensic science class in Alexandria, Chantilly, Herndon, Ashburn, Falls Church and McLean. "Students learn about the science in criminal justice, like blood-typing and fingerprinting by actually doing the experiments and seeing them in action," said Stalcup.

"Students get a lot of personal attention because the classes are small, and the instructors either have or are pursuing a degree in the topic they're teaching," said Stalcup. "They're all very passionate about the subject they're teaching."

Academic camps might be a good fit for students who are curious about a particular area of study. "Many parents want something that is both fun and educational, meaning it will help their child keep [busy] and develop skills needed during the school year," said Tina M. Morris, Child Development Programs Consultant at George Mason University. "I think both parents and

educators realize that summer vacation does not have to be a break from learning."

The decision to send a child to a camp that focuses on reading, science, math or another school subject instead of a purely recreational camp is a personal one, says Lado. "There are some kids who can visit their grandparents in Maine all summer and they come back to school in the fall and pick up where they left off," she said. "Then there are other kids who can't pick up easily. Those are the kids who would benefit from an academic program."

Students appreciate the ability to focus on one subject in a relaxed atmosphere in an academic camp. "If kids are taking a subject at a fast-clip pace, but they don't do well, they miss key skills. The next year they

move to a higher level class, but the same problem still exists," said Lado. "When they take a week or two during the summer and immerse themselves in a subject, they go stronger into the next school year. In camp, it's the only thing they're doing academically and they can concentrate on it."

For example, The Madeira School in McLean is offering summer programs in Trigonometry and Geometry. "These courses are intended for advancement into higher level math classes, and based on our classes taught during the academic year," said Ashley Smith, Associate Director of Communications at Madeira. "A student who is interested in math and wishes to advance to higher levels will benefit, as well as students who need a refresher or a better understanding before moving ahead."

When choosing an academic camp, parents should look for camps that are not all work and no play. "I want to make sure it has a healthy balance of recreational and educational enrichment activities," said Morris. "If the campers are enjoying the activities and the counselors are skilled, the program should, as a natural effect, promote the building of positive relationships with their peers and their counselors."

Preparing for Summer Camp Away

BY MARILYN CAMPBELL
THE CONNECTION

A child's first residential summer camp experience can be fraught with emotions that run the gamut from excitement to terror. While glee at the thought of a summer filled with sports, swimming, crafts and new-found friendships can be the dominant feeling, the thought of an extended period of time away from home can cause sadness and anxiety for both parents and their children.

An American Camp Association study showed that 96 percent of children who attend sleep away camps experience homesickness at some point during their stay. While these emotions are normal, parents can help children tame the pre-camp jitters. The life-long lessons gained from such camps make it worth the effort.

"Becoming comfortable with your child being away at summer camp, perhaps the first extended separation you have had, is a matter of trust," said David Kaplan, Ph.D. of the American Counseling Association in Alexandria, Va.

"Trusting your child that they can handle themselves without your supervision. Trusting that they can handle relationships with other children. Trusting that they can get up in the morning, take a shower, wash their clothes, and change their sheets without your prodding."

ACKNOWLEDGING THAT HOMESICKNESS is normal and many campers experience it, can help children accept and cope with their emotions.

"Expecting to miss home and feel somewhat anxious helps children feel less surprised and overwhelmed when it occurs," said Barbara Meehan, Ph.D. executive

director, Counseling and Psychological Services, George Mason University in Fairfax, Va.

A child's apprehension can be eased when parents share their own camp experiences, particularly positive memories.

"Don't let your child get caught up in your own anxiety about leaving for camp," said Linda McKenna Gulyn, Ph.D., professor of psychology at Marymount University in Arlington, Va. "Kids sometimes worry about the parents they left behind. Be positive, but not sad that your child is leaving."

Meehan says that developing a few self-soothing activities like playing outdoors or reading is one strategy for helping children deal with feelings of missing home. Identifying people with whom young campers can share their emotions is another means for dealing with homesickness.

"Talking to a camp counselor and even peers can help ease the difficult feelings and often they will learn they are not alone," said Meehan. Encouraging a child to make friends and become involved

Many emotions arise when a child goes to camp.

in camp activities will put the focus on the positive aspects of camp. Packing letters and stamped envelopes and developing a plan for letter exchange can help a child feel connected to their families.

"Isolating and avoiding what feels hard can often worsen anxiety and homesickness," said Meehan. "Remind your child they are stronger than they feel in the moment and that engaging in camp activities can be helpful."

There are times however when a child might not be ready for residential camps. The American Camp Association reports that while most cases of homesickness subside, there are cases — if a child is not eating or sleeping, for example — when it could be time to seek help. "Consult with camp professionals about resources if your child's anxiety worsens or persists," said Meehan.

Westminster School
A Classical Education for the 21st Century
Presenting Challenge - Building Character - Instilling Confidence

Right here in Northern Virginia, there is a school where the arts still thrive every day.

Accelerated Curriculum | Preschool - 8th Grade

Art, Music, Drama, French,
Daily PE, Bus Service,
After-School Care, Camp Programs

Enrolling for Fall, 2016

Great Falls Citizens Association

- ❖ **MAKE YOUR NEIGHBORHOOD BETTER BY JOINING THE GREAT FALLS CITIZENS ASSOCIATION**
Help influence the character of our community and how we address concerns such as traffic, development, zoning, retail, schools, parks and the environment. We need your support - go to gfca.org to join today.
- ❖ **BECOME AN EXECUTIVE BOARD MEMBER**
GFCA is seeking volunteers with an interest in our community who are willing to serve as Directors on the GFCA Executive Board for the term beginning July 1. No previous board experience is needed - just an interest in serving Great Falls. Candidates must be GFCA members. GFCA elections will be held Jun 14, 7:30 p.m. Contact Ed Phillips, Nominations Chair, at Nominations@gfca.org for more information.

GEORGE MASON UNIVERSITY **MASON GAME & TECHNOLOGY ACADEMY**
WHERE ART & TECHNOLOGY LEARN & PLAY

On-Site and On-Line Computer Game Design & Programming Courses for Ages 6 to Adult

SUMMER 2016 PROGRAM REGISTRATION OPEN NOW!

- Intro and 3D Game Design (w/ Unity and Unreal4)
- Multi Platform Mobile App Development
- iOS App Development (Swift and Xcode)
- Art & Animation
- Concept Art to 3D
- Digital Art
- Sound & Music for Games
- Minecraft Modding
- Writing for Games
- Programming (Java, C++, C#, Python, Javascript XML)
- Cyber Security

Plus pre-college Residential option!

One of the fastest growing and most transformational community programs in the region today, the **Mason Game & Technology Academy** integrates all of the STEM core competencies in a challenging, fun, and engaging way. This program combines both the sciences and the arts, with creative & critical thinking and problem solving skills.

Experience On-Site courses in the Computer Game Design Labs at Mason in Fairfax, Loudoun and Prince William, and/or take On-Line classes from anywhere with our revolutionary new cloud-based mobile education platform **SCRIB** - engaging in real-time learning and peer-to-peer interaction.

From Colonial History to Future Entrepreneurs

Campers can explore diverse interests in specialty summer camps.

BY MARILYN CAMPBELL
THE CONNECTION

This summer dozens of elementary school-aged children will travel back in time to the Colonial Era where, among other things, they'll learn to spin cotton into cloth for garments.

Learning how to run a lemonade stand like a Fortune 500 company and use the profits to invest in the stock market will be on the agenda for other local children. Both activities are offered by local specialty camps aimed at giving children opportunities to explore their interests in a way that they cannot during the school year.

Camp Washington at Mount Vernon gives campers a glimpse of early American life.

“During the school year, there is so much emphasis on testing that the creative and collaborative nature of children gets lost.”

— Carolyn Lorente, Ph.D.

“I think summer camps are a great way to promote thriving if it is done right,” said Carolyn Lorente, Ph.D., Professor of Psychology at Northern Virginia Community College in Alexandria and a camp consultant. “During the school year, there is so much emphasis on testing that the creative and collaborative nature of children gets lost. A great camp can create space for our children to flourish.”

SPECIALTY CAMPS offer young campers a chance to focus on a specific area of interest such as cooking, financial literacy and even gaming.

For example, Spark Business Academy, a Northern Virginia based organization that teaches financial literacy to young students, is offering its Future Millionaires Camp in Arlington. Students learn about money concepts that range from setting up a lemonade stand that makes a profit to understanding the stock market.

“The name is definitely tongue in cheek,” said Chuchi Arevalo, the organization’s founder. “We teach personal finance, leadership and innova-

tion. We give them life skills that they aren’t learning in school and promote financial literacy that is fun even for students in first and second grade.”

RISING FIFTH- and sixth-grade students will get a chance to take a trip back in time this summer at Mount Vernon’s Camp Washington. During each of the three one-week sessions, campers explore the history of George Washington’s estate and learn about his legacy.

From farming and spinning fibers into cloth to making ice cream and meeting the estate’s heritage breed animals, hands-on activities will give campers a glimpse of many aspects of early American life at Mount Vernon.

“The summer camp is designed to help engage students while having fun,” said Melissa Wood, spokeswoman for Mount Vernon. “[It] gives kids the opportunity to go behind the scenes and experience history in their own backyard.”

YOUNG GAME DESIGN aficionados can spend the summer with Mason Game & Technology Academy’s (MGTA) camps. Students take classes such as Game Design, Creation and Entrepreneurship, Minecraft and Cyber Defense.

“We run our classes at Mason in Fairfax, Loudoun, and Prince William,” said Vera Lichtenberg, Director of the Mason Game & Technology Academy at George Mason University.

“We also do a great deal of community outreach to train teachers, engage underserved students, and generally, help students realize that Game Design is a STEM field that not only engages those who love technology, but also those on the artistic side: writers, music composers [and] designers.Ó

MGTA is part of the Mason Computer Game Design Program and the Community Outreach Youth Program for the Virginia Serious Game Institute.
